To the best knowledge and belief of the Issuer, the above information has been accurately reproduced. The Issuer is able to ascertain from the above information published by the Swap Counterparties that no facts have been omitted which would render the reproduced information inaccurate or misleading.

The Swap Agreements

Under each Swap Agreement relating to the Class A Notes the Issuer will undertake to pay to the respective Swap Counterparty on each Payment Date an amount equal to the amount of interest on the nominal amount of the Class A Notes outstanding on each Payment Date, calculated on the basis of a fixed rate of interest of 0.1194 per cent. *per annum* on the basis of 30/360. The respective Swap Counterparty will undertake to pay to the Issuer on each Payment Date an amount equal to the floating rate of interest on such outstanding nominal amount of the Class A Notes, calculated on the basis of EURIBOR plus 0.57 per cent. *per annum* on the basis of the actual number of days elapsed in an Interest Accrual Period divided by 360, and subject to a floor of zero.

Under each Swap Agreement relating to Class B Notes (except for the Series 2020-1 Class B Notes and the Series 2020-2 Class B Notes) the Issuer will undertake to pay to the respective Swap Counterparty on each Payment Date an amount equal to the amount of interest on the nominal amount of the Class B Notes outstanding on each Payment Date, calculated on the basis of a fixed rate of interest of 0.6840 per cent. *per annum* on the basis of 30/360. In respect of the Series 2020-1 Class B Notes and the Series 2020-2 Class B Notes the Issuer will undertake to pay to the respective Swap Counterparty on each Payment Date an amount equal to the amount of interest on the nominal amount of the Class B Notes outstanding on each Payment Date, calculated on the basis of a fixed rate of interest of 0.732 per cent. *per annum* on the basis of 30/360. Each Swap Counterparty will undertake to pay to the Issuer on each Payment Date an amount equal to the floating rate of interest on such outstanding nominal amount of the Class B Notes, calculated on the basis of EURIBOR plus 1.20 per cent. *per annum* on the basis of the actual number of days elapsed in an Interest Accrual Period divided by 360, and subject to a floor of zero.

Payments under each Swap Agreement will be exchanged on a net basis on each Payment Date. Payments made by the Issuer under the Swap Agreements (other than termination payments related to an event of default where the Swap Counterparty is a defaulting party, or termination

event due to the failure by the Swap Counterparty to take required action after a downgrade of its credit rating) rank higher in priority than all payments on the Notes. If the amounts paid by the Issuer to a Swap Counterparty are insufficient to meet the Issuer's payment obligations under the Swap Agreements, such payments by the Issuer will be used for payments due under the each Swap Agreement relating to the Class A Notes and, to the extent such payment obligations have been fully satisfied, will be used for payments due under each Swap Agreement relating to the Class B Notes. Payments by a Swap Counterparty to the Issuer under the respective Swap Agreements will be made into the Distribution Account and will, to the extent necessary, be increased to ensure that such payments are free and clear of all taxes.

Events of default under the Swap Agreements applicable to the Issuer are limited to, and (among other things) events of default applicable to the respective Swap Counterparty include, the following:

- (1) failure to make a payment under the Swap Agreements when due, if such failure is not remedied within three Business Days of notice of such failure being given; or
- (2) the occurrence of certain bankruptcy and insolvency events.

Termination events under the Swap Agreements include, among other things, the following:

- (1) illegality of the transactions contemplated by the Swap Agreements; or
- (2) an Enforcement Event under the Trust Agreement occurs or any Clean-Up Call or prepayment in full, but not in part, of the Notes occurs; or
- (3) failure of the respective Swap Counterparty to maintain its credit rating at certain levels required by the Swap Agreement, which failure may not constitute a termination event if (in the time set forth in the applicable Swap Agreement) the respective Swap Counterparty:
 - (i) posts an amount of collateral (in the form of cash and/or securities) as set forth in the Swap Agreement; or
 - (ii) obtains a guarantee from an institution with an acceptable rating; or
 - (iii) transfers its rights and obligations under the Swap Agreement to an Eligible Swap Counterparty.

Upon the occurrence of any event of default or termination event specified in a Swap Agreement, the non-defaulting party, an affected party or the party which is not the affected party (as the case may be, depending on the termination event) may, after a period of time set forth in the Swap Agreement, elect to terminate such Swap Agreement. If a Swap Agreement is terminated due to an event of default or a termination event, a Swap Termination Payment may be due to the respective Swap Counterparty by the Issuer out of its available funds. The amount of any such Swap Termination Payment may be based on the actual cost or market quotations of the cost of entering into a similar swap transaction or such other methods as may be required under the Swap Agreement, in each case in accordance with the procedures set forth in the Swap Agreement. Any such Swap Termination Payment could, if market rates or other conditions have changed materially, be substantial. Under certain circumstances, Swap Termination Payments required to be made by the Issuer to a Swap Counterparty will rank higher in priority than all payments on the Notes. In such event, the Purchased Expectancy Rights and the General Cash Collateral Amount may be insufficient to make the required payments on the Notes and the Noteholders may experience delays and/or reductions in the interest and principal payments on the Notes. If a Swap Termination Payment is due to the respective Swap Counterparty, any Swap Replacement Proceeds shall to the extent of that Swap Termination Payment be paid directly to

such Swap Counterparty causing the event of default or termination event without regard to the Order of Priority as specified in the relevant Swap Agreement.

A Swap Counterparty may, at its own cost, transfer its obligations under the Swap Agreement to a third party which is the Eligible Swap Counterparty. There can be no assurance that the credit quality of the replacement Swap Counterparty will ultimately prove as strong as that of the original Swap Counterparty. Any Swap Termination Payments exceeding Swap Replacement Proceeds will be paid to such Swap Counterparty in accordance with the Order of Priority.

Governing law

The Swap Agreements, and any non-contractual obligations arising out of or in connection with the Swap Agreements, are and will be governed by, and construed in accordance with, English law.

III. Update of the section "Weighted Average Lives of the Notes/Assumed Amortisation of the Purchased Expectancy Rights and Notes", (page 77 - 79 of the Base Prospectus)

The section "Weighted Average Lives of the Notes/Assumed Amortisation of the Purchased Expectancy Rights and Notes" shall be deleted in its entirety and replaced by the following:

Weighted Average Lives of the Notes

Weighted average lives of the Notes refers to the average amount of time that will elapse (on a 30/360 basis) from the date of issuance of a security to the date of distribution of amounts to the investor distributed in reduction of principal of such security (assuming no losses). The weighted average life of the Notes will be influenced by, amongst other things, the rate at which the Expectancy Rights are paid, which may be in the form of scheduled amortisation, prepayments or liquidations and the rate at which realisation proceeds are generated under the Expectancy Rights.

Purchased Expectancy Rights

The following table is prepared on the basis of certain assumptions, as described below, regarding the weighted average characteristics of the Purchased Expectancy Rights and the performance thereof.

The table assumes, among other things, that the Issuer holds a pool of Purchased Expectancy Rights with the following characteristics,

- (a) the Portfolio is subject to a constant annual rate of prepayment as set out in the below table under the header "CPR" and its amortisation profile is based on the run-out schedule to be disclosed in the Monthly Investor Report with respect to the Payment Date falling in May 2020;
- (b) no Purchased Expectancy Rights are repurchased by the Seller;
- (c) each Series of Notes is expected to have the characteristics on 26 May 2020 as set out in the below table

- (d) the Payment Date is assumed to be the 25th day of each month;
- (e) the Clean-Up Call is exercised except for the scenario at 0% CPR below;
- (f) the Purchased Expectancy Rights are fully realised;
- (g) the Expectancy Rights Discount Rate is to be 4.338 per cent. and the payments are discounted back to 30 April 2020;
- (h) third party expenses and servicing fees together are assumed to be 1.03 per cent.;
- (i) no Early Amortisation Event occurs;
- (j) no tap issuance has been made;
- (k) no extension of the Revolving Period as of the Payment Date falling in September 2020;
- (I) the Subordinated Loan balance is EUR 2,463,175,603.32;
- (m) the Accumulation Account balance is EUR 0.00;
- (n) the theoretical swap rate required to swap the Subordinated Loan is 2.3549 per cent; and
- (o) the General Cash Collateral Amount as of the Payment Date falling in May 2020 is EUR 244,866,240.00,
- (p) Receivables in arrears are paid during the first period.

The approximate average lives of the Notes, at various assumed rates of prepayment of the Purchased Expectancy Rights, would be as follows:

Revolving Series

		Class A		Class B				
CPR (per cent.)	Average Life in Years First Principal Payment		Expected Maturity	Average Life in Years	First Principal Payment	Expected Maturity		
0% (no CuC)	1.55	Oct-2020	Jun-2023	1.83	Jan-2021	Aug-2023		
2%	1.52	Oct-2020	Mar-2023	1.76	Jan-2021	Mar-2023		
5%	1.48	Oct-2020	Feb-2023	1.72	Jan-2021	Feb-2023		
10%	1.42	Oct-2020	Jan-2023	1.65	Jan-2021	Jan-2023		

The exact average lives of the Notes cannot be predicted as the actual rate at which the Purchased Expectancy Rights will be repaid and a number of other relevant factors are unknown.

The average lives of the Notes are subject to factors largely outside the control of the Issuer and consequently no assurance can be given that the assumptions and the estimates above will prove in any way to be realistic and they must therefore be viewed with considerable caution.

The information set out in this section entitled "Weighted Average Life of the Notes" has been provided by the Lead Manager for use in this Base Prospectus and the Lead Manager (subject to the qualifications in this section) is solely responsible for the accuracy of the information set out in this section entitled "Weighted Average Life of the Notes" taking into account the assumptions selected above, except to the extent that any inaccuracy results from information provided by VWL to the Lead Manager for the purpose of preparing this section of the Base Prospectus in which case VWL is solely responsible for the accuracy of the information set out in this section entitled "Weighted Average Life of the Notes" to the extent of the inaccuracy.

The calculation of the approximate average lives of the Notes as made by the Lead Manager is based on the assumptions selected above, is produced with respect to the date of this Base Prospectus only and is, in particular, not based on any tap-ups or term take-outs to occur with respect to any Series of Notes after the date of this Base Prospectus. However, it should be noted that the exact average lives of the Notes cannot be predicted as the actual rate at which the Purchased Lease Receivables will be repaid and a number of other relevant factors are unknown and largely outside the control of the Issuer and the Lead Manager. Therefore, each investor should be aware that any such assumption is likely to change and any such change in any assumption used for calculating the approximate average lives of the Notes may lead to a change of the approximate average lives of the Notes. Furthermore, it should also be noted that the calculation of the approximate average lives of the Notes as made by the Lead Manager and as made by the provider of the cash flow model pursuant to Article 22(3) of the Securitisation Regulation might deviate from each other due to different calculation methods used by the Lead Manager (for the purpose of calculating the Weighted Average Life of the Notes) and the provider of the cash flow model (for the purpose of Article 22(3) of the Securitisation Regulation).

To the best knowledge and belief of the Issuer, the above information has been accurately reproduced. The Issuer is able to ascertain from the above information provided by the Lead Manager that no facts have been omitted which would render the reproduced information inaccurate or misleading.

IV. Update of the section "Amortisation Profile of the Purchased Expectancy Rights (Run out schedule)", (page 80 of the Base Prospectus)

The section "Amortisation Profile of the Purchased Expectancy Rights (Run out schedule)" shall be deleted in its entirety and replaced by the following:

The amortisation of the Purchased Expectancy Rights is subject to factors largely outside the control of the Issuer and consequently no assurance can be given that the assumptions and the estimates above will prove in any way to be realistic. They must therefore be viewed with considerable caution.
